Friday February 20th 1891  
not in cave

It has been a quiet day with no visitors & a great deal of snow has blown with the North West winds. Father got home from Custer City and reported all well in that place and at Masso City. He said Samuel J. Small of New York City was at Masso City on business.

Saturday February 21st 91  
not in cave

J. M. Moore & Father started for Hot Springs this morning & Father has not got home yet (7:50 P.M.) I have not been in the cave today on account of not feeling well, more than anything else. I started on itemized map of the Simpson's Palace Route today & got the most of the Guide Hall Branch finished in good colors. The day has been cold but I guess tomorrow will be warmer, because the shell is giving us noises. After getting home sick after staying out of the cave so long.

Sunday February 22nd  
not in cave

The warmest day we have had since the 26th day of January 1891. at 8:00 a.m. George McManus came on a visit & left at 2:00 P.M. at 11:30 a.m. J. H. West came on a visit and left at 1:30 p.m. at 1:00 p.m. Father returned from Hot Springs and reported all well in that place. I got an answer to the note that I sent Melvin A. Wood yesterday but not satisfactory as I wished him to answer it in person. I wrote a letter to grandmother today but will not get a chance to send it until Tuesday as father is going to town Tuesday if all is well.
